AEFS OFFERS LIGHTING SOLUTIONS AEFS Teams Up with HyTek

WILMINGTON, OH – January 19, 2010 – AEFS has teamed up with Hytek to offer lighting solutions that can reduce operating expenses. The new technology fixtures generate more light using a patented light harvesting technique. The cost savings are generated from less kilowatt usage per fixture. Typically, the average business facility can save 50-85% of the energy required to generate up to 300% more light output. Depending on the size of your facility and type of existing fixtures, the monthly cash flow can be substantial which results in a rapid Return On Investment.

A POSITIVE AFFECT ON THE ENVIRONMENT

In considering a new lighting solution, weigh the importance of the environmental impact. The average new industrial lighting system that replaces traditional 1000 Watt HID lamps with T8 6-lamp fluorescents helps decrease air pollution and environmental damage every year:

Example of Reduction of Pollutants When Replacing Average 1000 Watt HID System

With T8 6-Lamp Fluorescents:

2,937,336 Pounds of Carbon Dioxide
2,895,561 Grams of Sulfur Dioxide
11,357,701 Grams of Nitrogen Oxide

By Removing the Example Quantities of Pollutants, New Lighting Can Have the Same Affect on the Environment as if:

277 Autos were removed from the road each year
178,020 Gallons of Gas were saved each year

359 Acres of Trees were planted

In a typical warehouse or commercial facility lighting accounts for a massive **60%** of your total electrical costs. By offering lighting solutions that are environmentally friendly in addition to being cost effective, businesses can help decrease air pollution and environmental damage by considering to update lighting in warehouses, office areas, factory floors, and more.

AEFS and HyTek both have proven track records in service reliability. The partnership is a long-standing relationship that combines capabilities for maximum customer satisfaction.

AEFS

A division of ABX Air, ABX Equipment and Facility Services (AEFS) is an established provider of airport support services. AEFS has over 25 years of experience in facilities maintenance, material handling equipment installation and maintenance, equipment/vehicle maintenance and repair, to provide exceptional service and meet a diverse range of customer needs.
