

Cincinnati (CVG) Aviation Support Equipment and Maintenance Services

LGSTX Services specializes in providing aviation support equipment and maintenance services. Our unique blend of services provides our customers with efficient, high quality solutions that keep their operations moving. With over 30 years experience, LGSTX Services offers value driven, high quality solutions to a broad range of airline, airport and corporate clients across the United States. We are located on the CVG airport for your convenience, near the badging office.

We have the expertise to repair and maintain all types of GSE. We understand the need for reliable ground support equipment to ensure on-time aircraft departures. Our trained mechanics are available for every vehicle type used in aircraft GSE to handle your preventive or reactive maintenance needs. We can tear down, setup or transport any ground support equipment. In addition, we can service various other types of equipment including, vans, trucks, cars, forklifts, pallet jacks, and much more. While we work on your equipment, it will be serviced in a secured gated area.

If you need gap-fill equipment while yours is being serviced, we provide our customers with short-term solutions so not to interrupt your operation. LGSTX Services provides its customers with a full line of equipment options.

If you find you need immediate assistance, our call-out ramp maintenance can provide you support. We can perform maintenance repairs onsite, and other services as required. Contact us for more details.

GSE Rental

Keeping within a schedule is essential. When ground support equipment fails, replacements are necessary. LGSTX Services has a wide array of GSE rentals in stock, and can provide cost breakdowns to help you make your GSE rental decision. We can provide ground support equipment by the hour, day or week. The GSE is professionally maintained to ensure dependability and fueled for service.
