LGSTX Services has the expertise to repair and maintain all types of ground support equipment (GSE). In the airline industry, its standards of reliability are second-to-none.

It is imperative to have reliable GSE in the aviation industry. LGSTX Services’ team of mechanics have experience working with all types of GSE from deicers to tugs.

LGSTX Services maintains close contact with manufacturers to ensure all updates and recalls are performed on your aircraft GSE. We can perform preventive maintenance as well as perform overhaul and refurbishment of all GSE types.

Preventive Maintenance for Ground Support Equipment

LGSTX Services will develop a preventive maintenance program that is designed to ensure your GSE continues to operate reliably.

As an initial offering, LGSTX Services can evaluate your current GSE and provide you with a summary of recommended actions to improve the overall operational reliability of your equipment, as well as make recommendations for safety and OSHA compliance.

Benefits

- Defined GSE maintenance planning.
- Operational cost reduction based on improved GSE maintenance planning.
- Preventive maintenance can ensure equipment operates optimally and maximize equipment expectancy.
- Ensure to improve the overall operational reliability of the equipment.
- Can track all of the equipment utilizing the latest asset management programs, allowing you to efficiently maintain your GSE.
